Caroline Ledbetter

August 30, 2016

A preliminary analysis of the dental data set. There were 130 observations in the data set. There were 27 observations missing final measurements. 10 of these missing observations were in the high treatment group. (Table 1.)

Table 1: Number of Missing Values by Treatment Group

trtgroup	attach1year	pd1year
1	3	3
2	3	3
3	5	5
4	6	6
5	10	10

Table 2: Frequency of Gender

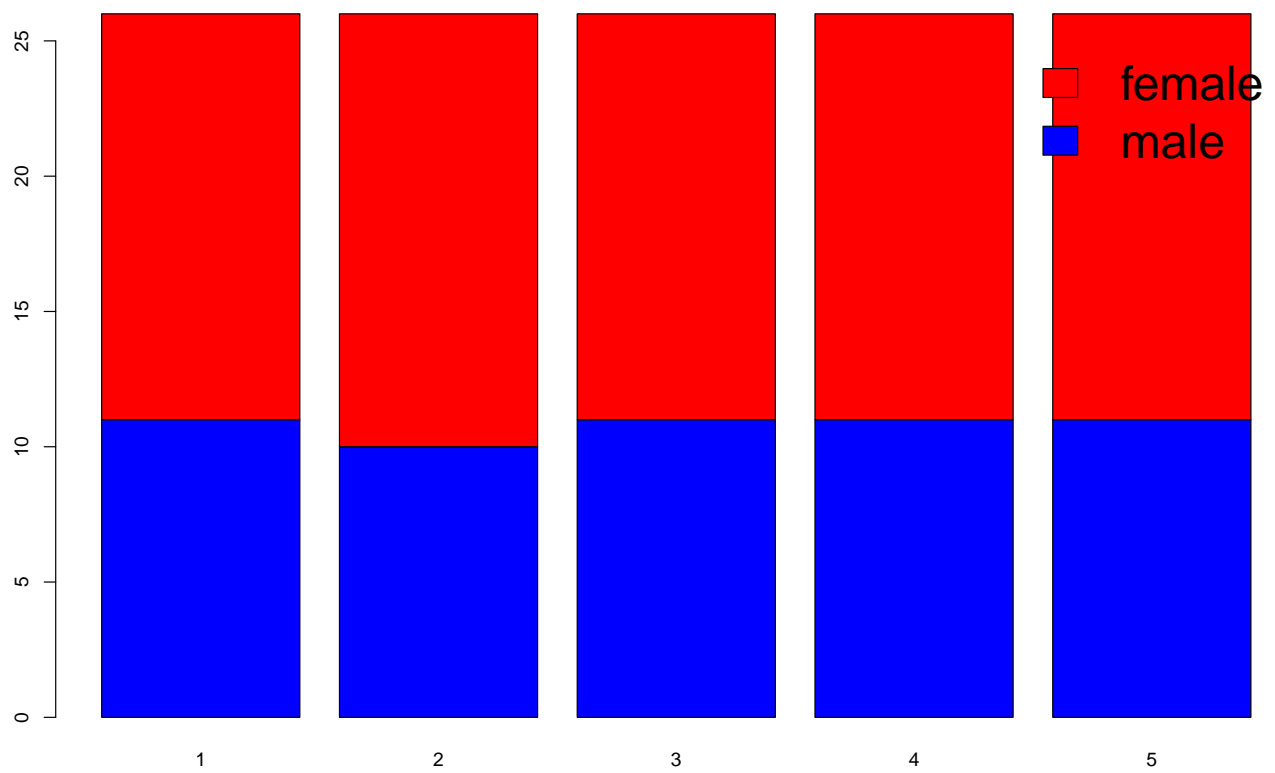

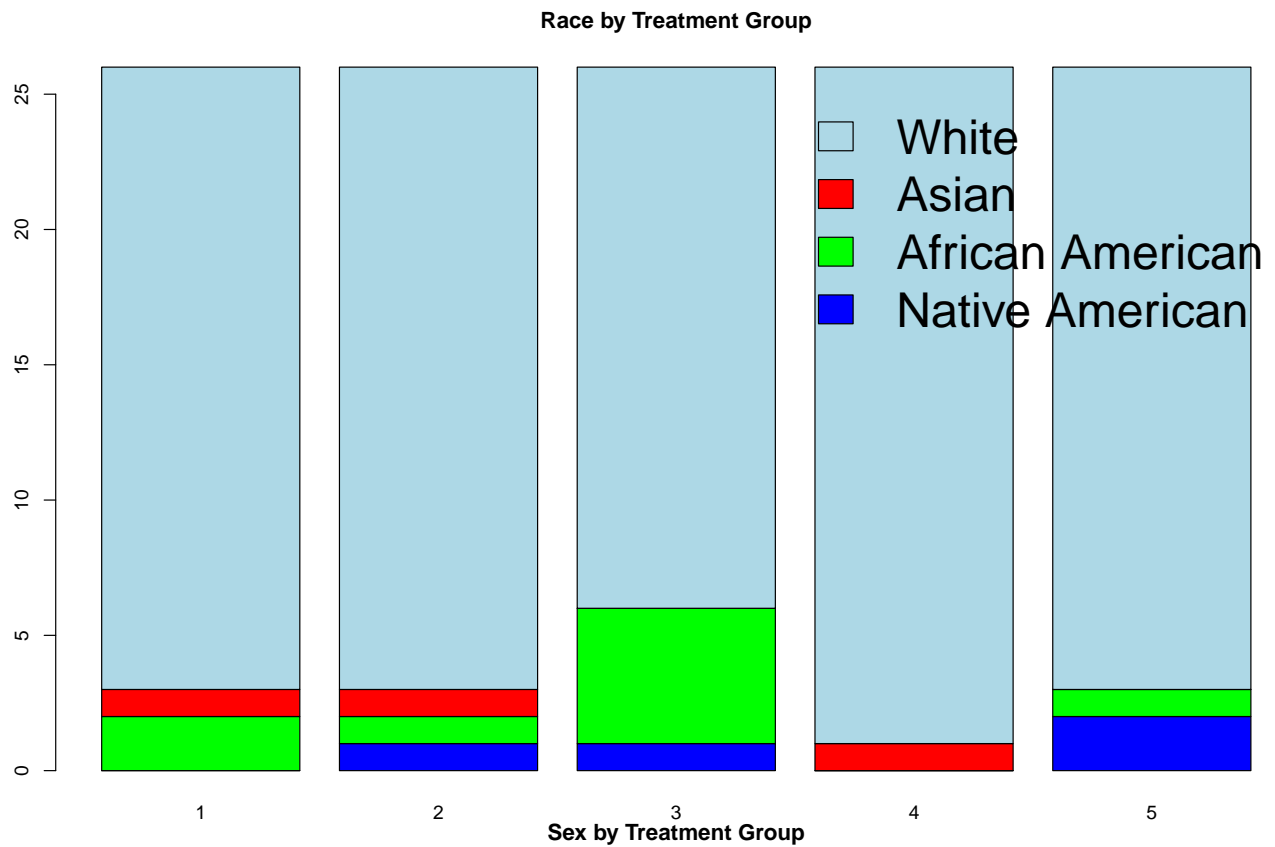

male	female
54	76

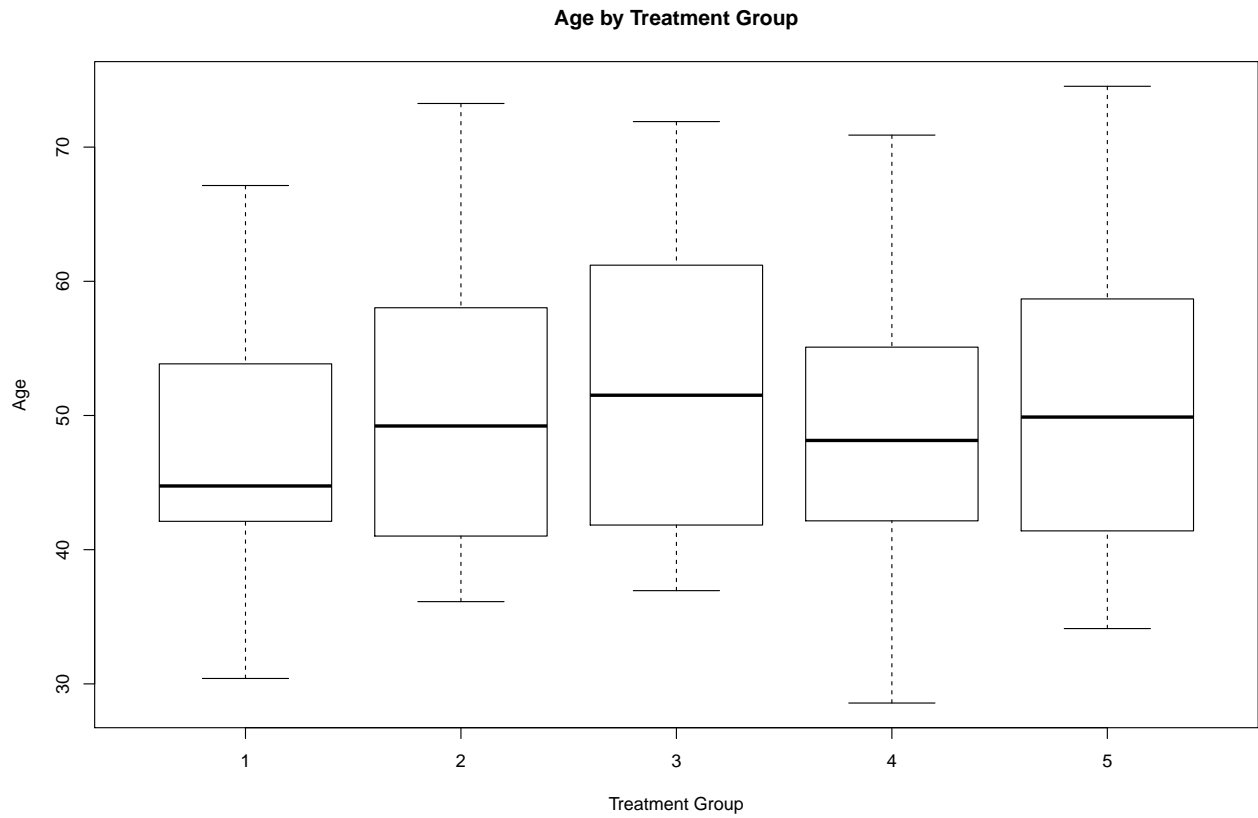

Table 3: Frequency of Race

Native American	African American	Asian	White
4	9	3	114

Table 4: Frequency of Smoking Status

No	Yes
81	48

A preliminary look at results.
